- Six Sigma Green Belt
- Lean Implementation

"Mike was a wonderful instructor who presented the material in an easy to understand way. The activities were engaging and the class has practical significance to the work we are doing. Wonderful course!"

- W. Serin, Materials Engineer

"Instructor clearly has a deep understanding of subject matter and was able to keep me engaged and interested throughout the course."

- J. Larson, Quality Manager

Michael M. McCauley is a full-time senior consultant with Illinois BIS specializing in quality systems, tools, and methodologies with over 30 years of industry experience.

Having established his leadership skills in various executive management roles, Michael successfully led and participated on regional and global quality improvement initiatives - including major cost of quality reduction programs and revising the global advanced product quality planning process. While holding a Director of Quality position for global controls manufacturer, Michael successfully re-implemented an entire quality organization from the ground up. This resulted in a significant reduction in quality costs, a surge in first pass yield, and increased customer satisfaction levels which supported future business revenues.

EDUCATION and CERTIFICATION

Michael is a member of the American Society for Quality (ASQ) since 1992; an ASQ Certified Quality Engineer since 1996; IRCA/RAB Certified Lead Assessor (1995); Exemplar Global Certified Lead Auditor for ISO 9001:2015, IATF 16949:2016 (QM, AU, TL designations); and has recently completed a Global Executive Development Program (high-potential).

Bachelor of Science degree in Electrical Engineering - *Illinois Institute of Technology (Chicago)*

Master of Business Administration degree - *Keller Graduate School of Executive Management (Chicago)*

MBA in Financial Management - *Loyola University of Chicago*
BS Engineering Operations Research and Systems Analysis - *University of Illinois at Chicago*

AAS Plastics Technology - *College of DuPage*

100% Agreement

[Results from 2017 and 2018 instructor feedback surveys received from more than 200 learners]

A3 Problem Solving: "Very useful class that I will be recommending to my maintenance production managers. Discussion allowed great interaction and brainstorming between class members."

- Dean Griffing, Manufacturing Engineer

Root Cause Analysis: "This program enhanced my knowledge and gave me a means to express my concerns, solutions, and issues visually. Huge help when approaching management."

- Jess Reed, Quality Inspection
